—Mr. Simmons. who has charge of the nurse department of the Howards, last night received a note from Miss E. M. Flantigan, a very worthy lady, tursing the sick family of Mrs. Steele, at No. 213 Court street, stating that three drunken men were raising a disturbance and behaving outrageously in the house. Mr. Simmons promptly procured the services of two policemen and accompanied them to the place designated, where they found the doors barricaded. Miss Flannigan, on being told this fact, asked Mrs. Steele if the door should be forced, to which she gave her consent. The policemen then forced the door, but found only one person, a man named Frederich Heider, a nurse from New Orleans, laying on a bed drunk and asleep, with a Smith and Wesson pistol by his side on the bed. The others had fied. EDITORS APPEAL—I consider it my duty to make known the following information, with the hope that it may be the means of benefiting the public in general, and more especially the fever-infected districts. I wish to say that I make no pretensions of being a practicing physician, excepting in the great emergencies through which we have passed. I have devoted many years to the pharmaceutical branch thereof, and have necessarily been thrown in contact with eminent medical men, having the pleasure of their intimate acquaintance; and during my residence in New Orleans I made the study of yellow-lever a specialty. As to the origin of the disease, we will leave that a mooted question, it being my purpose to take it as it is, it undoubtedly being of a poisonous, infectious nature, and not contagious—that is, it may be communicated from one to another by breathing the atmosphere of the infected locality, but cannot be contracted by means of buching persons who have the disease; hence the quarantining of goods and chattels is entirely useless and unnecessary. So far as the treatment is concerned, I would say that the following formula was talked over and decided upon as the best adapted to the nature of the complaint by three of the most eminent physicians, and has been found to be generally successful. The medicine I believe to be not only a cure, but also a preventive. The medicine should not be administered after the third day of the Fever, to be followed by diaphoretics, and diureties for the next three days. For the first five days the internal temperature of the patient will, perhaps, average one hundred and three degrees. When the fever is subsiding the tendency of the di-ease is to settle in the stomach, which must be closely guarded for three days after the first five days the internal temperature of the patient will, perhaps, average one hundred and three degrees. It was unfortunate that the law is so rigid that only those who are licensed dealers could buy, otherwise very handsome prices could have been realized, as the article was very sweet for smoking purposes.

Editors Appeal.—The above from the Nashville American, of the twenty sixth Instant, will recall the identity of the man who, in the sympathy of his heart for suffering friends and humanity generally, thus freely disposes of a year's laborious toil. The donor is no other than Charley Rogan, that magnificent soldier of the late war, first a member of company K, Bates's Second Tennesses regiment; latterly, a member of Bates's staff. Like the true irishman that he is, he wears his heart upon his sleeve, and is never deaf to the call of country or of friends. Bayard Taylor's "Song of the Camp" sketches such characters:

The loving are the daring."

Branch, a son-in-law of Mr. Cummins's, which were interred Thursday night at nine o'clock.

—A rather singular instance was related to this reporter last night. Last Sunday a week ago, Messrs. The Scalian and Charles Jones, when the sufferers of the south by pellow-fever and the next day, went to the country on a visit to some refuge friends. They returned and entered upon their duties, as engaged. On Thursday, two days after a ward, both were taken sick with strongly marked cases of the yellow-fever, and yesterday Scalian died. Jones, it was thought would die resterday, but last night a favorable change set in, and he may recover. There would have been nothing strange about any one coming into the city and taking the fever, but evidently these young men caught the middy in the country. We hope this will not include any returned from Grenada pesterday. They report order restored in that ill fated city, the fever having exhausted itself tor want of material on which to feed. Are you suffering from ill-health in any of its many and multifarious forms, consequent upon a lingering, nervous, chronic or functional disease? Do you feel nervous, debilitated, fretful, timid, and lack the power of will and action? Are you subject to loss of memory, have spells of fainting, fullness of biood in the head, feel listless, moping, unfit for business or pleasure, and subject to fits of melancholy? Are your kidneys, stomach, or blood, in a disordered condition? Do you suffer from rheumatisti, neuralgia or aches and pains? Have you been indiscreet in early years and find yourself harassed with a multitude of gloomy symptoms? Are you timid, nervous, and forgetful, and your mind continually dwelling on the subject? Have you lost confidence in yourself and energy for business pursuits? Are you subject to any of the following symptoms: Restless nights, broken sleep, nightmare, dreams, palpitation of the heart, bashfulness, confusion of ideas, aversion to society, dizziness in the head, dimness of sight, plmples and blotches on the face and back, and other despondent symptoms? Thousands of young men, the middle-aged, and even the old, suffer from nervous and physical debility. Thousands of females, too, are broken down in health and spirits from disorders peculiar to their sex, and who, from false modesty or neglect prolong their sufferings. Why, then, further neglect a subject so productive of health and happiness when there is at hand a means of restoration?

YELLOW FEVER A CORDING to the most intelligent medical opinlon yellow-fever is intensified malaria, and Dr.
William Alex Green, of Georgia, member and exvice-president of Georgia Medical Association, member of State board of physicians, and chief sungeon
of artillery of A. P. Hill's corps after great experience in malarial and yellow-fever, indorses and
recommends most highly in the Cincinnati Medical
News, the Bedford (Va.) Springs ALUM and Iron
Mass, as a preventive and cure for both of these
dreadful diseases. He states that this mass should
be taken rapidly and in large doses—saturating the
blood with it and putting the system under its influence as speedily as possible; that it lessens the
palies in the head and limbs, and also the nausea,
that under its use the urine rapidly loses its thick
bloody character, becoming clear and limpid, that
the paroxyms are rendered milder, less frequent and
of shorter duration, that is also most beneficial from
the very moment the acute stage subsides, and during convalescence, that he places great reliance in
this mass, using such other adjunct treatment as the
course of the disease may suggest. The Cincinnati
Medical Netes urges all to try this remedy, that its
efficacy may be known and utilized.

This mass may be had of druggists, or ordered
from the Bedford Alum and Iron Springs Company,
Lynchburg, Virgiola, and it can be sent by mall,
post paid, or express at fifty cents or one dollar a
package, or tw odollars and a half or five dollars for
half dozen.
